

Presco Stake Flag Probe

Description:	Presco's Stake Flag Probe is designed to help with the insertion of Presco Marking Flags
Construction:	The Marking Flag Insertion Tool is made of durable, rustproof machined aluminum and is fitted with a padded handle. The handle and foot pegs are welded to the body of the tool for long lasting performance. The finish of the flag insertion tool is brushed aluminum. The dual tip is constructed of a stainless point and forked prong with a coated steel thread body.
Length:	The flag insertion tool body is 36" long without the dual tip and 6" wide at the handle. The overall assembled length is approximately 38-3/4" with the tip
Weight:	3 LBS.
